Dust Control

- Preparing site assessments of potential dust generation
- Managing the implementation, operation and maintenance of dust-suppression means and methods — including water trucks, track-out devices, sweepers, palliatives and renegotiation
- Training for dust-control compliance
- Consulting on dust control-ordinance compliance

Storm-Water Pollution Prevention

- Preparing site assessments of potential storm-water issues
- Developing storm-water pollution prevention plans (SWPPP books/maps)
- Managing the implementation, operation and maintenance of storm-water pollution prevention programs, including silt fencing, waddles and storm-water retention/detention installations
- Training for storm-water compliance
- Consulting on storm-water ordinance compliance

Construction Waste Recycling

- Preparing plans and logistics
- Assessing costs and benefits
- Providing job-site recycling operation and coordination
- Managing transport and recycler operations

Hazardous and Non-hazardous Waste Management

- Providing soil-remediation services including excavation, transportation and treatment/disposal, and drum consolidation
- Offering lab-pack services including identifying, inventory, segregation, packaging, labeling, documenting, transporting and proper disposal
- Cleaning sump pits, oil/water separators, storm-water drainage systems, sanitary sewers and other underground installations; and cleaning of surfaces, pipes and heat exchangers

Environmental Emergency Response

- Providing immediate and reliable emergency-response services in the event of an in-plant spill or other environmental emergency
- Dispatching trained and certified personnel
- Offering a fully outfitted environmental emergency-response equipment trailer, and pump and vacuum equipment
